

Lunar Worktable

Three Planeteers

School: Sanger High School

Teacher: Mr. Cuaron

Students: Angad Gill, Angel Razon, Antwon Leonardo

[Lunar worktable](#)- See our website for more information

Instructions

1. Pick up the table top
2. Put the legs into the sockets
3. Adjust legs to suit your needs
4. Plug the power cord into a source

Description

The worktable has magnets that help guide the legs into place so that you can lock it into place manually by inserting the pin. The worktable features a backboard where there will be an extra outlet. An Adjustable lamp will be able to illuminate anywhere on top of the table and anywhere on the ground. The Drawer in the front will be used to carry small pieces that can be lost if they fall on the Moon's Surface
