ROLL WITH IT

Sanger High School

Teacher: Shaun Cuaron

Students: Isaac Silva, Gabriella Avila, Aaron Rojas

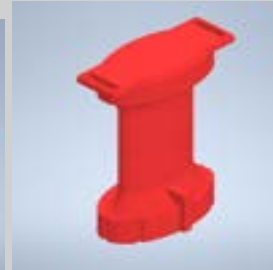

What Is It ?

This device is a container that shakes dice ranging from D'4s through D'20s. The main parts of this device are the Cup, the Pusher, and the Acrylic Base. This device is intended to allow you to shake dice and stop the dice from floating around in an instant. The dice stop as you use the pusher to push the dice against an acrylic base. This device also provides a true random roll and can be used by any user aged 4 and up.
